

Frankincense Edition **CATALOGUE**

Frankincense (Olibanum)

Olibanum is a resin of the *Boswellia* trees grown in harsh desertic environments. The resin serves as their immune system.

Olibanum resin possesses antioxidant, anti-inflammatory, immunomodulatory, wound healing, regenerative, and antimicrobial properties and is used within all major medicinal traditions as an external and internal natural remedy.

Olibanum-Propolis Tincture

- ANTI-INFECTIOUS

A universal anti-infectious remedy and immunity booster. Olibanum together with Propolis (a bee product) promote remarkable anti-infectious, anti-inflammatory, wound healing, and immunomodulatory properties.

Indications and use:

Wounds: apply locally for disinfection and promotion of tissue healing.

Mouth inflammations: add 2 drops on your toothbrush while teeth washing. Rinse well.

Sore throat: 10-20 drops in 50 ml of water - gargle and spit.

Internal use as a general anti-infectious remedy (gastric, respiratory, urinary infections): 10-20 drops in a glass of water. You may add a honey. Drink and repeat when necessary up to 3x/day. The dosage for children should be adjusted to weight.

Ingredients: pure homemade plum brandy, olibanum, propolis, Alc.vol.50%.

Raw Olibanum *(Boswellia Sacra)* - OMAN

Forms of use:

FUMIGATION: Place 1-3 lumps on a hot charcoal or metal sieve over a candle flame. Purifies the air. Has anti-inflammatory and anti-infectious effects on the respiratory ways. Calms the mind, relieves tension, and improves mood.

CHEWING: The resin can be chewed like ordinary chewing gum. Excellent for treating aphthae and other inflammations in the mouth. The juices released also improve appetite and digestion.

IN WATER: Place 2 small lumps in a 500 ml bottle of drinking water and leave to infuse for 12-24 h. Shake occasionally. Drink on an empty stomach. Olibanum gives the water a delicious taste, aids digestion, and helps prevent intestinal inflammation and infection.

The water can be topped up continuously over several days.
